Abstract

This bibliography contains journal articles, book chapters, books, edited volumes, theses, grey literature, bibliographies and other resources on genocide that has taken place between 1980 and the present. While focusing on recent literature, the bibliography is not restricted to a particular time period and covers publications up to December 2018. The literature has been retrieved by manually browsing through more than 200 sources in relevant fields of social science studies. Additionally, full-text and reference retrieval systems have been employed to broaden the search.

Keywords: bibliography, resources, literature, genocide, one-sided violence, mass killing, state killing, ethnic cleansing, Rwanda, Burundi, Yugoslavia, Bosnia, Kosovo, Guatemala, Iraq, Yazidis, ISIS, Central African Republic, Sudan

NB: All websites were last visited on 05.01.2019. This subject bibliography is the second part of a two-part bibliography (Part 1 was published in Issue 9[2]) of Perspectives on Terrorism). To avoid duplication, this compilation only includes literature not contained in Part 1. However, meta-resources, such as bibliographies, were included in both parts. - See also Note for the Reader at the end of this literature list.

Introductory Note by the Editor

A bibliography on genocide in a terrorism journal might, at first sight, look out of place. However, both terrorism and genocide are extreme forms of political violence and both involve the one-sided killing of unarmed civilians. In fact, it is amazing that scholars who study terrorism have generally neglected to see this parallel with genocide. Recently, the terrorist group ISIS (Daesh) has attempted genocide against the Yazidis, an ethno-religious minority in Iraq. It is therefore useful at this time to provide a snapshot of the literature on genocide for the community of terrorism scholars.

Note
Whenever retrievable, URLs for freely available versions of subscription-based publications have been provided. Thanks to the Open Access movement, self-archiving of publications in institutional repositories or on author homepages for free public use (so-called Green Open Access) has become more common. Please note, that the content of Green Open Access documents is not necessarily identical to the officially published versions (e.g., in case of pre-prints); it might therefore not have passed through all editorial stages publishers employ to ensure quality control (peer review, copy and layout editing etc.). In some cases, articles may only be cited after getting consent by the author(s).
